

GENESIS COMPOSITES LTD

HEALTH AND SAFETY POLICY STATEMENT

The Company regards the promotion of Health and Safety to be an important aspect of our work.

Our policy is to take all reasonable measures to prevent personal injury and damage to property and protect everyone from foreseeable hazards associated with our work.

We require our employees to adhere to safe working procedures, and to use equipment provided in a proper manner and to wear personal protective equipment as appropriate.

ARRANGEMENTS

Good Housekeeping

- Keep work areas clean and tidy.
- Store acetone, catalyst, accelerators and resin in appropriate containers in a safe place where they won't get spilled.
- Accelerators and catalysts are potentially explosive if mixed together. Store separately.

Personal Hygiene

- Use protective equipment at all times. Wash splashes of catalyst etc. off skin immediately.

Waste Disposal

- Empty drums are to be disposed of through licensed waste route.
- Off-cuts and catalysed resin can go to landfill.
- Employees are encouraged to plan out their work to minimise waste.

Training

- The Company will provide training as and when necessary, and will expect its employees to participate.

Reducing Risks

- Risk Assessments and Method Statements will be prepared for site installation tasks and will be submitted for approval before work commences.
